

Passenger Carrying Data for United States Lines' S.S. United States

Maiden Voyage: July 1952. Retired: November 1969. Length: 990 feet. Beam 102 feet. Service Speed: 30 knots. Gross Tonnage: 53,329

S.S. United States

Year	Total Passengers Carried	Number of Crossings	Average Passengers per Crossing	Load Factor (Based on a passenger capacity of 1928)
1952	36,014	23	1566	81%
1953	69,244	46	1505	78%
1954	67,566	44	1536	80%
1955	70,106	44	1593	83%
1956	71,208	45	1582	82%
1957	66,828	45	1485	77%
1958	64,755	42	1542	80%
1959	63,669	48	1326	69%
^{1950s} Totals	509,390	337	1512	78%
1960	61,439	48	1280	66%
1961	52,249	45	1161	60%
1962	58,855	41	1435	74%
1963	53,874	38	1418	74%
1964	49,991	41	1219	63%
1965	34,110	33	1034	54%
1966	52,113	40	1303	68%
1967	45,020	38	1185	61%
1968	41,343	36	1148	60%
1969	42,643	33	1292	67%
^{1960s} Totals	491,637	393	1251	65%
Career Totals	1,001,027	730	1367	71%

This information is from *Transatlantic Passenger Movement* documents. It may differ slightly with other sources since it counts the number of crossings per year based on the completion date of the trip. For example, if the S.S. United States left for a crossing at the end of one year but finished it in another, that whole crossing would go in the New Year's total. This data is for crossings only and not cruises. Research provided by Allan E. Jordan. Information compiled by Brent I. Holt.
